

Industria Project is the company that deals with complex services in the range of civil engineering. They are the author of the projects realised in the whole territory of Poland. The company has executed ca. 300 designs with diversified complication level covering all branches and all types of structures and buildings. Based on proved solutions and reliable technical knowledge, while using the advanced information technologies in the range of facility designing, **Industria Project** is 40-person team of designers, architects, constructors, engineers of all branches. The designing tools and philosophy with which the company is driven, are based on designing with Customer's cooperation, according to the world standards of 21st century.

The business activity of Industria Project Sp. z o.o. is realised in the range of:

- Complex comprehensive designing of building facilities while using effective systems and solutions as among the others BIM- Building Information Modelling, The Quality System consistent with ISO 9001/2008 and design management based on MS Project, matrix management
- Optimisation of existing architectural and building solutions
- Investment consulting

Cooperation offer /scope of services:

1. Preparing the functional and utilisable programs
2. Design concept
3. Inventory
4. Building permit design with arrangements
5. Detailed design
6. Tender design
7. As-built documentation
8. Check and authorisation of designs
9. Check of offers from potential General Contractors with choosing the General Contractor
10. Building inspector's supervision
11. Formula: design and build

Specializations:

1. Industrial and technological facilities
2. Laboratories, hospitals, medical facilities
3. Power engineering facilities
4. Public utility facilities, among the others office buildings, education and high education buildings
5. Energy-saving
6. Hydraulic engineering
7. Infrastructure

The experienced gained, using the state-of-art IT tools and well-qualified design team consisting of group of engineers having extensive design experience enable us to make complex and comprehensive designs in: architectural, constructional, hydraulic engineering, sanitary, electrical and teletechnical as well as road specialisation.

Appointed people for contact with entrepreneurs are as follows:

1. Włodzimierz Werochowski - e-mail: w.werochowski@ibg.gda.pl, tel: 58 554 81 96
2. Paulina Pleskot-Rogozzińska - e-mail: biuro@ibg.gda.pl, tel: 58 554 81 96
3. Kamila Czerwińska - e-mail: biuro@ibg.gda.pl, tel: 58 554 81 96

We invite you to visit our website (www.ibg.gda.pl) that may bring nearer our company and its offer to you and allows you to get familiar with so-far executed design works. We hope for our future cooperation.
